

# CD AUDIO LOGGER

High Performance 4 Channel CD Audio Logger

Record your important calls! Get crystal-clear audio quality. Keep organized records of all your inbound and outbound telephone and radio conversations.

Just insert a blank CD and your recordings are quickly copied from the internal hard drive. Keep indelible records of important conversations on rugged, inexpensive CD media. Store years of calls in a single CD binder.

Play calls in any Windows PC. Calls are time-stamped for precise recall. Find calls instantly. Just click on the time and date of your call. Copy, email, encrypt, and transfer calls on any computer.

Use Evidence Builder software to search by caller ID, caller name, or notes. Look up callers by phone number to determine address and contact information. Analyze officers, agents and dispatchers for improved service. Produce professional evidence recordings in minutes, not hours.

This system is ideal for smaller EMS, E-911, fire, and emergency dispatch centers with up to 12 lines. Multiple recorders may be stacked in standard rack-mount enclosures to increase channel capacity.

Due to its cost-effective design, this product is often chosen by commercial customers such as ambulance companies, securities centers, and alarm dispatchers. Call now and let us ship your logger risk free for a 15-day evaluation.

Applicable laws must be observed when recording.

© 2003 DLI. US patent 6,122,239, additional pending.

- Powerful, cost-effective recording with automatic backup to CD.
- Completely self-contained unit requires no connection to a computer network.
- Each unit records up to 4 lines simultaneously.
- Windows software locates address and contact information using caller-ID.
- A reliable 10,000RPM Ultra-SCSI hard drive stores over 15,000 typical calls.
- A fast 52X CD-RW writer saves recordings quickly and automatically.
- An internal monitoring system with speakers lets you listen to live audio while recording.
- CDs hold over 21 channel-hours of recordings, typically 400-500 calls.
- A selectable warning tone automatically informs callers that they are being recorded.
- Level controls adjust automatically for crystal-clear audio quality.
- A complete installation kit with cables is included for quick connection to handsets, headsets, microphones, or standard analog phone lines.
- Fully compatible with all DLI hardware and software logging solutions, including Evidence Builder software.

Item No. MIL-4000C,G
