# INTEGRATED FLIGHT TRACKING
ADS-B, ASDI, ACARS and Radio Logging for Airport Mangment

- On-field ADS-B receivers give you accurate live flight tracks at your airport with -no delay-.

- FAA ASDI radar feeds are fully integrated for nationwide coverage.

- Communications receivers monitor and record all ATC and ground communications including commercial and military channels.

- All recordings and flight tracks are backed up in secure off-site storage.

- A unified messaging and recording database gives you secure remote access to recordings and flight tracks via the web.

- DLI loggers now track ACARS communications including text messing, aircraft maintenance and condition reports, passengers on board, weights, fuel, power settings, and more.

- All distress radiobeacons and emergency frequencies including military and commercial ELT's EPRIBs and PLBs can be monitored, located, and recorded.

- "Push" emergency communications to first responders. Monitor live from your cell phone.

- Field proven reliability. Thousands of channels are now being monitored by DLI loggers in airports worldwide.

Know your airport. Display flight tracks instantly. Listen in live on ATC and ground communications. Search through years of recordings in just seconds.

DLI loggers are the first to integrate ADS-B for accurate to-the-second flight tracks along with traditional FAA ASDI radar and -and- ACARS for messaging and overseas flight tracking.

Radar tracks and communications recordings are stored off-site for redundancy. Log in securely from any remote location - everything is web-accessible.

Search by aircraft registration, flight number, time/date, and geographical region. Search by keyword. Display full motion flight tracks with just a mouse click. Listen in live to ATC communications as it occurs. Monitor ACARS. Have the logger alert you automatically. DLI loggers store years of recordings. Go back as far as you like.

Analyze and streamline airport operations. Maintain compliance with published FAA procedures. Improve safety and emergency response.
