

# NETWORK AUDIO LOGGER

## High Performance 4 Channel Web-Based Audio Logger

*Record your important calls! Get crystal clear audio quality. Keep organized records of all your inbound and outbound calls. Digital quality gives you crystal clear audio—you can hear a pin drop!*

*Play calls from any web browser. Find calls instantly. Just click on the time and date of your call. Copy, email, encrypt, and transfer calls on any computer. Use your existing network for secure access to important calls.*

*Calls are time-stamped for precise recall. Powerful Windows software lets you search by caller ID, caller names, or notes. Look up callers by phone number to determine important address and contact information. Analyze agents and dispatchers for improved service and support.*

*Get fast network access to all your recordings without complicated setup. Installation is simple: Snap in your phone lines and network jack. Point your web browser at the logger, and you'll instantly have access to call recordings.*

*The universal input connects to telephone lines, handsets, radios and headsets. Get the same technology that major 911 call centers and government agencies rely on. Call now and let us ship your logger risk free for a 15-day evaluation.*

Applicable laws must be observed when recording.

© 2003 DLI. US & foreign patents pending.

- Most powerful, cost-effective network audio logging solution available!
- 120GB disk capacity stores thousands of calls. Years of recordings can be kept on-line in most applications.
- Calls may be securely accessed worldwide via your existing LAN.
- Windows software lets you find address and contact name information using caller ID.
- Connects easily to handset, headset, radios, or standard analog phone lines.
- Calls are automatically time-stamped and can be stored in a variety of standard audio file formats.
- Level control adjusts automatically for crystal clear audio quality.
- Built in web server creates a professional web interface to all your recordings.
- Built in file server gives you access to recordings using Window's "Network Neighborhood".
- Fully compatible with all DLI hardware and software logging solutions, including Evidence Builder Software.

Item No. MIL-4000N
