

Using Alexa to Control Power

Compatible Devices

This applies to DLI WiFi products like [the Pro switch](#) with firmware 1.3.9.0 or higher. Echo, Dot, Spot, Shadow and Tap are supported via Belkin emulation.

Setup

First, be sure that your Echo is fully set up and has access to your network. Install the power controller per the manual. Log in to the power controller. Go to the **SETUP** page to set outlet/device names and to enable UPnP. Then select the **External APIs** link from the left sidebar. Enable UPnP and press

External APIs	
Allow JSON-RPC:	<input type="checkbox"/>
Allow REST style API:	<input checked="" type="checkbox"/>
Enable UPnP service:	<input checked="" type="checkbox"/>
Enable SNMP service:	<input checked="" type="checkbox"/>
Relax non-HTML method CSRF checks:	<input type="checkbox"/>
Relax non-HTML content type CSRF checks:	<input type="checkbox"/>

Under UPnP outlet binding configuration, check to enable the outlets

that Alexa will be allowed to control. Set "Profile" for each outlet to belkin_wemo. Press

UPnP outlet binding configuration			
#	Enable	Alternate name	Profile
1	<input checked="" type="checkbox"/>	<input type="text" value="Car Charger"/>	<input type="text" value="belkin_wen"/>
2	<input type="checkbox"/>	<input type="text" value="Outlet 2"/>	<input type="text" value="belkin_wen"/>
3	<input checked="" type="checkbox"/>	<input type="text" value="Kitchen Light"/>	<input type="text" value="belkin_wen"/>
4	<input checked="" type="checkbox"/>	<input type="text" value="My PC"/>	<input type="text" value="belkin_wen"/>
5	<input checked="" type="checkbox"/>	<input type="text" value="External Backup Drive"/>	<input type="text" value="belkin_wen"/>
6	<input type="checkbox"/>	<input type="text" value="Outlet 6"/>	<input type="text" value="belkin_wen"/>
7	<input checked="" type="checkbox"/>	<input type="text" value="Lamp"/>	<input type="text" value="belkin_wen"/>
8	<input type="checkbox"/>	<input type="text" value="Outlet 8"/>	<input type="text" value="belkin_wen"/>

Finally, tell Echo to “discover devices”. If the total count is short, repeat the discovery step.

That's all there is to it!

Test your new app, "Alexa, turn on the Car Charger!"

Have a smart script or unique way to use your switch?
