

# NEXT GEN 9-1-1 LOGGERS

## Unified recording of analog, P25, VoIP and T1

### One System Records it All

- Simultaneously record from P25 radios, dispatch consoles, outside phone lines, analog extensions, VoIP, military radios, and security microphones all in perfect digital quality.
- Record from Next Gen sources including text messaging, GPS tracks, radar data, TDD, E-mail and other sources.
- No vendor offers better telecom audio quality than DLI. Motorola audio processing gives you crystal clear recording from any radio or telecom signal source.
- Calls are organized for quick access in spreadsheet and timeline views. Every recording includes a digital signature with time and date and file information. Professional editing software quickly selects only the audio of interest.

### 15-1500 Terrabyte Storage Capacity

- Redundant disk arrays store years of recordings on line for instant access. Recordings may be securely accessed from any authorized location. RAID capacity gives you performance to store all recordings permanently and make on-line backups.

### Fast, Secure Access to Recordings

- Gone are the days of unreliable DVD and DAT systems. Produce recordings in seconds, not hours.
- On-site installation and training included with every system. You'll be up and running within days. We'll customize the system and software to your specific needs.

### Redundant Backup - On and Off-Site

- DLI can back-up your recordings off-site via a heavily encrypted secure tunneling link. 50GB Blu-Ray disks are shipped to your department monthly for on-site storage. Use the large capacity RAID array to make your own on-line backups automatically.

### Powerful Hardware, Reliable Software

- The combination of IBM servers, large RAID storage, and modular software gives you reliability and performance that can't be matched by "PC based" alternatives.

### DIGITAL LOGGERS, INC.

# LICENSE FREE SOFTWARE

## Set up and Configuration Wizard

An easy-to-use windows setup utility makes configuration a breeze.

Get it right the first time, even with little or no telecom experience.

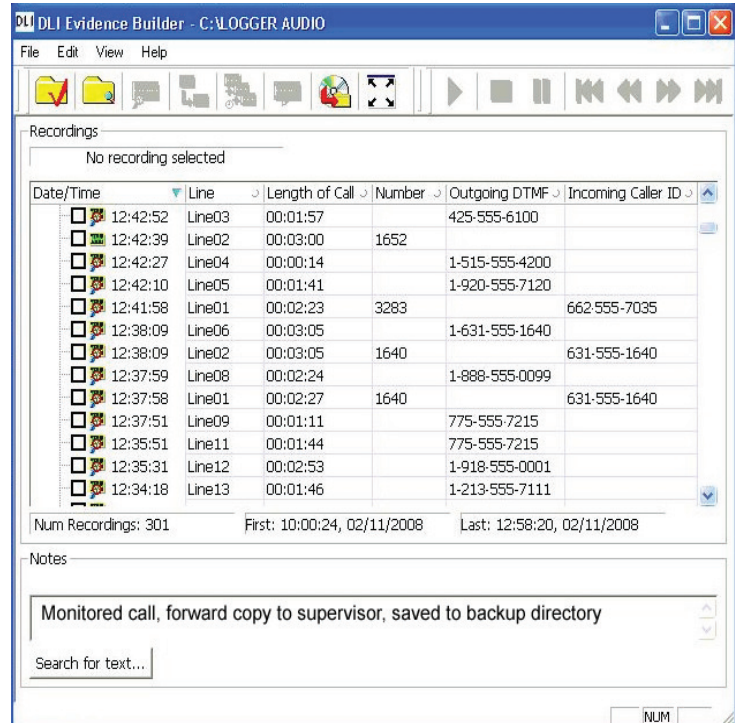

## Evidence Builder Call Analyzer

Evidence Builder Software is a powerful program used to locate and analyze recordings in a spreadsheet format.

Use it to analyze incoming calls, create lists, sort calls, and search by time, date, line, DTMF, DID, nummber dialed, etc.

Quickly locate recordings on a local workstation or server. Copy, email, or transfer calls to an audio editor.

## Recording Manager

The main logging application gives you a real-time display of incoming recordings.

Calls are neatly organized in daily directories. Disk space is automatically managed. One click leads you directly to the recordings for that line.

## Live Remote Monitoring

Local or remote users can be assigned access privileges to allow remote interception and live monitoring of calls.

Monitor locally via LAN or world-wide via WAN.

## ANI/ALI Call Detail Recorder

Get detailed reports on every call, even internal calls from one PBX extension to another. Capture all the call detail information provided from your PBX serial port. Document calls between extensions.

ANI, ALI, or SMDR data streams are logged using our call detail recording utility. This program logs all serial data from up to 8 PBX or modem ports simultaneously.

ALL SOFTWARE IS INCLUDED OUTRIGHT WITH NO "PER SEAT" FEES OR ANNUAL LICENSING
